From the Heart of Toni

It probably is not news to you that here in Texas we are still having a scorching heat wave. Fortunately Karen and I are doing fine and appreciate the coolness in our home. We are busy with projects and of course our main focus is on the lightwork and the continuing presentation of the messages from the masters.

We were so privileged to have guests from Taiwan; Dennis Tsou arrived on July 1st the day after I returned from Colorado. Dennis celebrated his 1 year journey on his road to enlightenment by coming here. He has spent his last year traveling all around the world. He came for his reading and connection for his spiritual insights. He left for Florida to be amongst those who watched the last launch of Atlantis. It was a must on his agenda as he had been there for the very first Atlantis space journey. Soon after Dennis left, Robert Lu arrived from his visit in Evergreen, Co where he enjoyed the many adventures offered by being in this beautiful place of USA. Robert began the lightwork last year by attending the workshops in Taiwan. He is an amazing person who is devoting his time to help other students in the light. Dennis returned after the launch and met Robert. Also George Ho arrived from Taiwan and stayed with his relatives not far from where we live. George is an artist and well known in Taiwan. They all attended the workshops held at Miracles of Joy bookstore. Santiago Villarreal was our special guest for the workshop and we joined our gifts of channeling and his shaman songs. This became another very special experience. A recording of this is available on a CD.

When Dennis completed his stay here he left for NYC and requested that he have at least 30 cds to be placed in the United Nations. The cd contained a Message for the Nations as given through White Eagle and it was so awesome! So Dennis left with the cds with a mission to place them in the United Nations building. He was quite a thrill to have this take place. Within 2 hours the cds were all taken.

Janine Davis: ACIL student www.diverstea.com

For 12 years, I have been fortunate enough to spend many hundreds of hours underwater, while Scuba Diving. What I discovered is that the sea put me into a meditative state, cleansing and healing me, as I am now doing with her. When I dive I perform Reiki on the reefs, to help them survive the imbalances we are creating by our treatment of the planet and her resources. What I have observed is that fish LOVE Reiki. Recently I went to Curacao with a Healthy Diving group and whenever I channeled Reiki underwater huge schools of Creole Wrasse and other tropical fish would swarm around the area! I have also been placing crystals into deep crevices of the reefs I have visited, and am developing an Energy Grid, to stay connected to the coral, and continue to send light to the oceans.

I have been managing two online shops for several years and have been sending crystals to everyone who places an online order with the request that they place or send one crystal into the sea or lake or river with the thought of healing the Oceans and her inhabitants. All water eventually flows or falls into the sea. Our planet is 2/3 water, and the Oceans are in trouble. By placing the crystals in the water, you are sending a blessing, healing and connecting a grid of energy and light that is growing one crystal at a time. All the crystals are connected to a Crystal Dolphin Meditation Cave which receives Reiki (Universal Light) Energy on a regular basis. Welcome to Crystal Dolphin Healing. We work with Crystal and Reiki Energy, and offer a selection of products to assist you on your journey of connecting with Love and Light and your essence self. **ABOUT US**

Crystal Dolphin Alchemy is a synthesis of Reiki Healing, Crystal Energy work and the amazing healing and nurturing energy of the Oceans, and her inhabitants. Crystal Dolphin Alchemy was born of a fusion of Herbalist, Healing Energy, Crystal Magic and Synchronicity. Since 2002, I have been the owner of Diversitea, and created several health related Herbal Teas, and also found and marketed what I considered to be the best natural products on the market for maintaining and achieving optimal health and well being. Visit Diversitea for more information about these products. On my birthday in 2008, I decided to go Crystal Digging in the Ouachita Mountains, and have been working intensively with crystals, and Crystal Energy Healing for the past several years - within a week, I was "in the Crystal Quartz Business" in a pretty significant way, having purchased enough crystals to start a nice sized internet retail store.

Message from the Masters: An Excerpt from Archangel Uriel:

Angels are messengers and there are many. Our messages come through the Source of those who have been assigned to be a receiver and as we speak, what we receive is being transmitted to you.

So the lesson we wish to bring is the lesson of acceptance that what is in effect is a process of changing consciousness and that applies to everything you experience. Whether you are physically in an interactive experience of great stress, it is simply a part of a healing process bringing an inner-change to what is being created for your personal understanding, insight and growth. Those who are part of your experience are also in agreement with the ability to be changed inwardly and outwardly through the path of their soul's choice.

So regardless how difficult, conflicting and struggling the appearances create, in the overview there is a healing process in effect. As you are integrating through the process of the work of light, you are accelerating the personal abilities to grasp the project of humanity's movement into a more enlightened evolved state of being. What appears as the most challenging of all human consciousness has its own time and effects but is stepping-stones to a greater outcome. The world is not ending; it is shifting into a new beginning that requires a great expansion in all levels of consciousness. It requires a shift and change in the understanding of human living in spiritual experiences. It requires a change intellectually, in regards to the advancements of technology and the advancements in disease control and the advancements in all phases of human living.

In the moment it appears that there is much that is in destruction and that is de-evolution and that is in the darkest stage of human living, even that is in its own progress and will have its outward expression in a new advanced stage of balance and harmony.

So at this moment we simply ask all of you to let go of the idea that it is all hopeless and that nothing can ever be shifted into a new perception. Rather see that the information, the guided conditions of human thinking has its own link to the higher self's of those who are the receivers of the light.

In this moment, perceive yourself totally and completely a receiver of the guidance of the spiritual perspective in all ways of living. Healing is an understanding that your physical self is tuning to a new frequency that is transmuting and transforming conditions in need of change. Your assistance to all of this comes through those you ask for their light. Ask and I will be able to help you through much of the challenges that seem to difficult to manage.

Ask Archangel Raphael, Archangel Michel and all other beings in the hierarchical consciousness to be a guardian in your path and to be an assistant in awakening to the abilities that lie in others and themselves. To awaken another is to see a mirrored reflection of yourself. When you can see in another what you have as the Source of your understanding, you're coming closer to that oneness with each other.

As for the lessons that are constantly part of your experience, the lessons are always presented in some form you are striving to heal, to learn from, to attain or to totally transform.

So in this moment, simply accept you are in the frequency that is most effective in awakening the most sensitive aspect of your nature. On a physical level it may increase to read the mind, the thoughts of other's express, to be more cognitive in that which is in extortion, to see through the illusions that are dramatized in human experience. Just be silent in yourself, accept what you know and be the expansion of light on all that you see in need of clarity and peace.

Now, in this moment, the lessons are being perceived in the heart of you, perceive you are connecting to the network of light. The network is a composite of vibrations that are sent into and through all of the many waves in the etheric plane, in the dimensions of the soul system of light and in the network there is an awareness of being a part of connecting with many beings who like you are opening their eyes and awakening to a state of becoming and are energized by the concept of seeing Divine Love and Peace as the overseeing intention of the human experience.

So connect and perceive that in the frequency of Orange Ray it will help open the eyes beyond the negativity, to open the eyes to accept that what is in emotion or in motion are all facets of consciousness. You are the director, the sender, the giver of matters of light, love and healing within all areas of earth's experience. You may begin to see that you are connecting too many places or just one that calls you, one that is drawing you to its own experience. Simply accept you are a bright light, you are magnifying the energy of your heart and you are connected to what will awaken in another their desire to see, to know and to become awakened in this life.

There are many places where there are those who live without hope, without the needs for the body or the mind or the soul. See that light comes, that needs are met, that resources are provided, that there is an awakening deep inside. Simply accept that beyond the war that plagues the conditions, there will be resolutions that unlock a change in human interaction. And it is so:

Feedback:

I just wanted to share this little bit. I had forgotten that Azreal said I was experiencing a healing event. This means Now! I went into the hospital on Saturday, and then again on Monday until Wednesday for my anemia. My hemoglobin levels had dropped as low as it can without suffering some serious consequences (actually, I think most people do suffer severe problems at those numbers). After 6 units of blood, I feel great. I must be feeling the Thunderbolt consciousness. I feel hope for the first time in a while, on so many levels. I feel so good! I had to drop the fear I had of allopathic medicine and hospitals and of receiving someone else's blood. I knew I wasn't alone, too. I was truly grateful for the great care I was receiving and the blood which had been donated. Life is good. I used the light a lot while I was in the hospital, especially while I was "hooked-up". There are some really beautiful people in hospitals! Thanks again for the amazing reading. I love both parts, yours and the Masters'.

Love and Light, **Amy Rhodes**
